

COURSE TEAM

VOLUME - I

ORGANIC CHEMISTRY STEREOCHEMISTRY REACTION MECHANISM

CONTENTS

	PAGE NO.
BLOCK - 1 : STEREOCHEMISTRY OF ORGANIC COMPOUNDS	1
UNIT - 1 : MOLECULAR REPRESENTATIONS AND CLASSIFICATION OF STEREOISOMERS	2-57
UNIT - 2 : MOLECULAR SYMMETRY AND CHIRALITY: ENANTIOMERS AND DIASTEREOISOMERS	58-121
UNIT - 3 : MOLECULES WITH ONE AND MORE THAN ONE CHIRAL CENTERS:	122-134
UNIT - 4 : ABSOLUTE CONFIGURATIONAL NOMENCLATURE DETERMINATION OF ABSOLUTE CONFIGURATION AND RESOLUTION OF RACEMATES:	135-187
UNIT - 5: AXIAL, PLANAR AND HELICAL CHIRALITY AND II- OR E, Z- DIASTEREOISOMERISM	188-235
BLOCK-2 : ORGANIC REACTION MECHANISM	236
UNIT 6 : BASIC CONCEPTS, ELECTRONIC EFFECTS, ELECTRONEGATIVITY RESONANCE, ACID AND BASIC CHARACTER OF ORGANIC COMPOUNDS	237-284
UNIT-7 : REACTION PATHWAYS:	285-311
UNIT-8 : ELECTROPHILIC ADDITION TO CARBON-CARBON DOUBLE BONDS	312-332
UNIT 9 : ALIPHATIC NUCLEOPHILIC SUBSTITUTION	333-355
UNIT 10 : NEIGHBOURING GROUP PARTICIPATION, AMBIDENT NUCLEOPHILES, AROMATIC NUCLEOPHILIC SUBSTITUTION AND ALIPHATIC ELECTROPHILIC SUBSTITUTION	356-377

COURSE TEAM

VOLUME - II

ORGANIC CHEMISTRY
BENZENOID NON-BENZENOID
HETROCYCLIC COMPOUNDS
NATURAL PRODUCTS

CONTENTS

	PAGE NO.
BLOCK-3 : AROMATICITY, BENZENOID NON-BENZENOID AROMATIC COMPOUNDS AND HETEROCYCLIC COMPOUNDS	378
UNIT-11 : CONCEPT OF AROMATICITY	379-401
UNIT-12 : NONBENZENOID AROMATIC COMPOUNDS SYNTHESIS AND REACTIONS OF 3,5,7-MEMBERED CARBOCYCLIC SYSTEMS:	402-416
UNIT-13: AZULENES AND POLYCYCLIC AROMATIC COMPOUNDS	417-435
UNIT 14 : HETEROCYCLIC COMPOUNDS	436 - 467
UNIT 15 : FUSED HETERO BICYCLIC AND TRICYCLIC SYSTEMS: CARBAZOLE, QUINOLINE, ISOQUINOLINE AND ACRIDINE	468-498
BLOCK-4 : NATURAL PRODUCTS	499
UNIT-16 : NATURAL PRODUCTS TERPENES AND TERPENOIDS	500-516
UNIT 17 : ALKALOIDS	517-545
UNIT 18 : CARBOHYDRATES MONOSACCHARIDES	546-597
UNIT 19 : CARBOHYDRATES DISACCHARIDES	598-605
UNIT 20 : CARBOHYDRATES POLYSACCHARIDES	606-618

PHYSICAL CHEMISTRY

QUANTUM CHEMISTRY, THERMODYNAMICS
ELECTRO CHEMISTRY, CHEMICAL KINETICS
AND PHOTO CHEMISTRY

CONTENTS

Sl. No.	Topic	Page No.
Block - I	QUANTUM CHEMISTRY	1 - 57
Unit : 1	Basic quantum chemistry	1 - 13
Unit : 2	Wave Mechanics of some simple systems with constant potential energy	14 - 25
Unit : 3	Hydrogen - like atoms	26 - 33
Unit : 4	Approximation Methods and Interaction of Radiation and Matter	34 - 42
Unit : 5	Theories of Chemical Bonding - Diatomic Molecules	43 - 57
Block - II	THERMODYNAMICS	58 - 124
Unit : 6	Concept of Thermodynamic Laws - First law of thermodynamics	58 - 81
Unit : 7	The Second law of thermodynamics	82 - 93
Unit : 8	Spontaneity and Equilibrium	94 - 112
Unit : 9	Ideal and Non-ideal solutions and activity coefficients	113 - 118
Unit : 10	Nernst Heat Theorem and Third law of Thermodynamics	119 - 124
Block - III	ELECTRO CHEMISTRY	125 - 202
Unit : 11	Electrochemical Cells First law of thermodynamics	125 - 142
Unit : 12	Polarization	143 - 156
Unit : 13	Electro Analytical Techniques	157 - 170
Unit : 14	Activity	171 - 182
Unit : 15	Corrosion	183 - 202
Block - IV	CHEMICAL KINETICS AND PHOTO CHEMISTRY	203 - 296
Unit : 16	Theories of Reaction rates	203 - 225
Unit : 17	Kinetics of Complex Reactions	226 - 239
Unit : 18	Reactions in Solutions	240 - 260
Unit : 19	Photochemistry	261 - 279
Unit : 20	Photochemical Reaction Mechanisms	280 - 296

CHEMISTRY (General)

MATHEMATICS - BIOLOGY

SPECTROSCOPY AND COMPUTERS

Contents

	Page No.
Block - 1 : Mathematics for Biology Students	1
Unit - 1 : Co-ordinate System.	2-17
Unit - 2 : Differential Calculus	18-33
Unit - 3 : Matrics	34-46
Unit - 4 : Integral Calculus	47-60
Unit - 5 : Differential Equations	61-76
Block - 2 : Biology	77
Unit - 6 : Cell Structure and Functions	78-88
Unit - 7 : Carbohydrates.	89-105
Unit - 8 : Fatty Acids	106-122
Unit - 9 : Amino Acids, Peptides and Proteins	123-130
Unit - 10 : Nucleic Acids	131-153
Block - 3 Spectroscopy - I	154
Unit - 11 : Rotational Spectra	155-165
Unit - 12 : Vibrational Spectroscopy - 1	166-175
Unit - 13 : Vibrational Spectroscopy - 2	176-186
Unit - 14 : Vibrational Spectroscopy - 3	187-191
Unit - 15 : Roman Spectroscopy	192-198
Unit - 16 : Electron Spectroscopy	199-214
Block - 3 Spectroscopy - II	215
Unit - 17 : H NMR Spectroscopy - 1	216-253
Unit - 18 : H NMR Spectroscopy - 2	254-265
Unit - 19 : NMR of Paramagnetic Compounds	266-278
Unit - 20 : Mass Spectrometry - 1	279-299
Unit - 21 : Mass Spectroscopy - 2	300-328
Block - 4 Computers	329
Unit - 22 : Introduction to Computers	330-342
Unit - 23 : Basic Language	343-354
Unit - 24 : C Language	355-372
Unit - 25 : Chemistry Applications using Basic Programme.	373-381
Unit - 26 : Chemistry Application using C Language	382-392
Glossary	393-395

M. Sc.

CHEMISTRY
INORGANIC CHEMISTRY

COURSE - I

**Symmetry of Molecules & Bonding, Coordination
Equilibria, Spectra and Reaction Mechanisms of
Metal Complexes & Bioinorganic Chemistry**

CONTENTS

BLOCK I : SYMMETRY OF MOLECULES

Unit 1: Symmetry Operations and Symmetry Elements	6-16
Unit 2: Mathematical Rules of Groups – Abelian and Non-Abelian	17-22
Unit 3: Molecular Point Groups	23-39
Unit 4: Group Multiplication Tables	40-47
Unit 5: Symmetry and Properties of Molecules – Molecular Polarity, Chirality and Optical Activity	48-58

BLOCK II : THEORIES OF BONDING AND ELECTRONIC SPECTRA OF METAL COMPLEXES

Unit 6: Crystal Field Theory – Splitting of Metal d-Orbitals in Different Geometries	61-71
Unit 7: Ligand Field Parameters	72-84
Unit 8: Molecular Orbital Theory	85-94
Unit 9: Free Ion Terms and Energy Levels	95-104
Unit 10: Orgel Diagrams	105-114

BLOCK III : REACTION MECHANISMS OF TRANSITION METAL COMPLEXES

Unit 11: Labile and Inert Complexes	117-123
Unit 12: Substitution Reaction Mechanisms of Octahedral complexes	124-136
Unit 13: Substitution Reaction Mechanisms of Square Planar complexes	137-145
Unit 14: Electron Transfer Reaction Mechanisms	146-154
Unit 15: Reaction Mechanisms of Organometallic Compounds	155-176

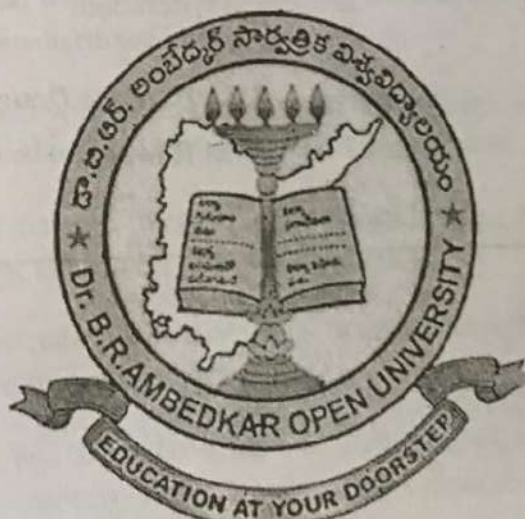

BLOCK IV :

Unit 16: Stability constants of Metal Complexes and Factors Influencing Stability	178-187
Unit 17: Methods of Determination of Stability Constants	188-196
Unit 18: Ligational aspects of Diatomic Molecules	197-208
Unit 19: Metal Clusters	209-217
Unit 20: Coordination Chemistry of Metal Ions in Biomolecules	218-242

Model Question Paper	243
-----------------------------	-----

PAPER-V- ANALYSIS OF ORGANIC MIXTURES

M.Sc. (Final) Practicals

CONTENTS

Block 1: Separation and qualitative Analysis general methods of binary organic mixture.

	03
Experiment 1: Systematic procedure for the separation of diethyl ether insoluble organic mixtures.	04
Experiment 2: Systematic procedure for separation of organic mixture based on salt formation-I.	06
Experiment 3: Systematic procedure for separation of organic mixture based on salt formation-II.	08
Experiment 4: Systematic procedure for separation of organic mixture based on salt formation-III.	11
Experiment 5: systematic procedures for Qualitative analysis of organic compounds.	14

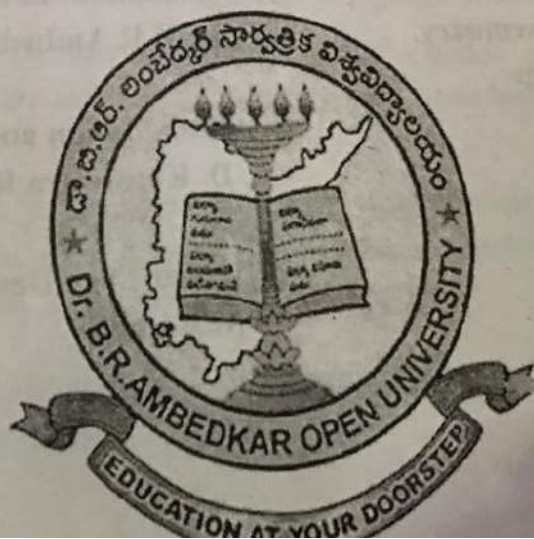

Block 2: Separation and identification of unknown binary organic mixture.

	46
Experiment 6: Identification of unknown binary organic mixture-I.	47
Experiment 7: Identification of unknown binary organic mixture-II.	53
Experiment 8: Identification of unknown binary organic mixture-III.	60
Experiment 9: Identification of unknown binary organic mixture-IV.	67
Experiment 10: Identification of unknown binary organic mixture-V.	74
Experiment 11: Identification of unknown binary organic mixture-VI.	81
Experiment 12: Identification of unknown binary organic mixture-VII.	88
Experiment 13: Identification of unknown binary organic mixture-VIII.	95
Experiment 14: Identification of unknown binary organic mixture-IX.	102
Experiment 15: Identification of unknown binary organic mixture-X	109

Block 3: Separation and identification of ternary organic mixture.

	110
Experiment 16: General separation procedure for ternary organic mixture.	117
Experiment 17: Identification of unknown ternary organic mixture-XVI.	119
Experiment 18: Identification of unknown ternary organic mixture-XVII.	128

COURSE-VI
CHEMISTRY
ORGANIC SYNTHESIS-I & II
SYNTHETIC STRATEGIES
AND
ASSYMETRIC SYNTHESIS

CONTENTS

BLOCK I: ORGANIC SYNTHESIS-I.	1
Unit 1: A brief review of functionalisation and functional group transformation reactions and oxidation of alkanes and alkenes.	2-24
Unit 2: oxidation of alcohols.	25-38
Unit 3: Reduction by catalytic hydrogenations.	39-54
Unit 4: reductions by hydride transfer agents.	55-75
Unit 5: Reductions by dissolving metals.	76-92
BLOCK II: ORGANIC SYNTHESIS-II.	93
Unit 6: Formation of carbon-carbon single bond.	94-114
Unit 7: Formation of carbon-carbon double bond.	115-134
Unit 8: Synthetic applications of organoboranes.	135-150
Unit 9: Synthetic applications of organosilanes.	151-165
Unit 10: Protecting groups in organic synthesis.	166-183
BLOCK III: SYNTHETIC STRATEGIES.	184
Unit 11: Introduction, target selection and terminology.	185-206
Unit 12: Disconnection approach with examples.	207-235
Unit 13: Strategic bond in carbocyclic and heterocyclic systems.	236-251
Unit 14: Applications of some important strategies in organic synthesis.	252-270
Unit 15: Some selected synthesis.	
i. Disparlure. ii. Z-Jasmone	271-284
BLOCK IV: ASYMETRIC SYNTHESIS.	285
Unit-16: Topicity, configurational descriptors and stereoselectivity.	286-302
Unit 17: Principle of asymmetric synthesis and analysis of stereoisomer mixtures.	303-314
Unit 18: Substrate controlled methods.	315-325
Unit 19: Auxilliary controlled methods.	326-337
Unit 20: reagent controlled and catalyst controlled synthesis.	338-348

**PAPER-VII: SYNTHESIS OF
ORGANIC MOLECULES AND
ISOLATION OF NATURAL
PRODUCTS**

M.Sc. (Final) Practical work book

<i>Block 1: More than one step Preparation of organic molecules.</i>	03
Experiment 1: Preparation 2-Phenyl Indole.	07
Experiment 2: Preparation of 7-Hydroxy-3-methyl Flavone.	11
Experiment 3: Preparation of 2,5-Dihydroxy Acetophenone	15
Experiment 4: Preparation of Benzilic acid.	18
Experiment 5: Preparation of Benzanilide.	22
Experiment 6: Preparation of Caprolactam.	26
Experiment 7: Preparation of Acridone.	
<i>Block 2: One step Preparation of organic molecules.</i>	36
Experiment 8: Preparation of 4-Chloro Toluene	37
Experiment 9: Preparation of Benzpinacol.	40
Experiment 10: Preparation of 7-Hydroxy Coumarin.	43
Experiment 11: Preparation of Photo dimerisation of Maleic anhydride.	46
Experiment 12: Preparation of Benzophenone.	49
Experiment 13: preparation of Vanillyl alcohol.	52
Experiment 14: Preparation of Ortho and Para-Nitrophenol.	55
<i>Block 3: Isolation of natural products from natural sources.</i>	56
Experiment 15: Isolation of Piperine from peppers.	59
Experiment 16: Isolation of Caffeine from Tea leaves.	61
Experiment 17: Isolation of Cineole from Eucalyptus leaves.	63
Reference	65
Appendix	66
Question paper	78

PAPER-VI- SPECTROSCOPIC IDENTIFICATIONS OF ORGANIC COMPOUNDS AND CHROMATOGRAPHY

M.Sc. (Final) Practicals

CONTENTS

BLOCK 1: SPECTROMETRIC IDENTIFICATION OF ORGANIC COMPOUNDS.	01
Experiment 1: IR, Mass, ^1H NMR ^{13}C NMR, UV spectroscopy for structure identification and Correlation tables.	02-22
BLOCK 2: DISCUSSES SOLVED PROBLEMS:	23
Experiment 2: Solved Spectral problem-1.	24-29
Experiment 3: Solved Spectral problem-2.	30-36
Experiment 4: Solved Spectral problem-3.	37-42
BLOCK 3: PROVIDES PRACTICE PROBLEMS.	43
Experiment 5: Spectral problem-4.	44-51
Experiment 6: Spectral problem-5.	52-59
Experiment 7: Spectral problem-6.	60-67
Experiment 8: Spectral problem-7.	68-75
Experiment 9: Spectral problem-8.	76-83
Experiment 10: Spectral problem-9.	84-91
Experiment 11: Spectral problem-10.	92-99
Experiment 12: Spectral problem-11.	100-107
Experiment 13: Spectral problem-12.	108-115
Experiment 14: Spectral problem-13.	116-123
Experiment 15: Spectral problem-14.	124-131
Experiment 16: Spectral problem-15.	132-139
Experiment 17: Spectral problem-16.	140-148
Experiment 18: Spectral problem-17.	149-156
Experiment 19: Spectral problem-18.	157-164
Experiment 20: Spectral problem-19.	165-173
Experiment 21: Spectral problem-20.	174-182
Experiment 22: Spectral problem-21.	183-190
Experiment 23: Spectral problem-22.	191-198
Experiment 24: Spectral problem-23.	199-206
Experiment 25: Spectral problem-24.	207-214
Experiment 26: Spectral problem-25.	215-222
Experiment 27: Spectral problem-26.	223-230
Experiment 28: Spectral problem-27.	231-238
Experiment 29: Spectral problem-28.	239-246

Experiment 30: Spectral problem-29.

Experiment 31: Spectral problem-30.

BLOCK 4: CHROMATOGRAPHY

Experiment 32: Thin layer chromatography: (TLC)-1.

Experiment 33: Monitoring of chemical reaction by thin layer chromatography.

Experiment 34: Preparative thin layer chromatography.

Experiment 35: Column chromatography.

Reference books -----276

Model question paper -----277.

247-25

255-26

263

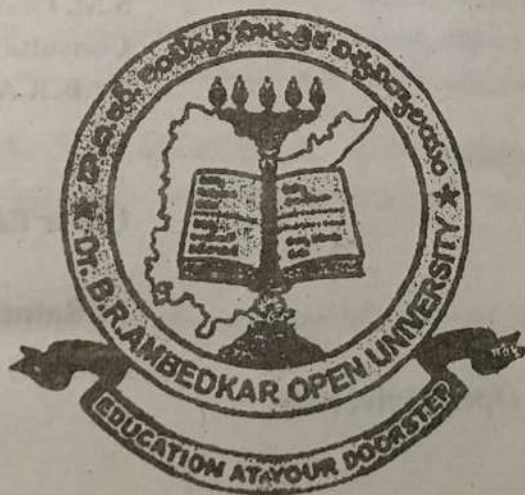

264-266

267-268

269-271

272-275

COURSE-V
CHEMISTRY
ORGANIC REACTION MECHANISMS-II
PERICYCLIC REACTIONS
ORGANIC PHOTOCHEMISTRY
STEREOCHEMISTRY-II

CONTENTS

	Page No.
BLOCK I : ORGANIC REACTION MECHANISMS-II	01
Unit 1 : Reaction intermediates-I	02-26
Unit 2 : Reaction intermediates-II	27-42
Unit 3 : Molecular rearrangements-I	43-57
Unit 4 : Molecular rearrangements-II	58-72
Unit 5 : Elimination reactions	73-90
BLOCK II : PERICYCLIC REACTIONS	91
Unit 6 : Classification and stereochemistry of pericyclic reactions	92-111
Unit 7 : Molecular orbitals and their symmetry properties	112-127
Unit 8 : Analysis of electrocyclic reactions	128-151
Unit 9 : Analysis of cycloaddition reactions	152-172
Unit 10 : Analysis of sigmatropic reactions	173-195
BLOCK III : ORGANIC PHOTOCHEMISTRY	196
Unit 11 : Electronic transitions	197-208
Unit 12 : Photochemistry of carbonyl compounds	209-229
Unit 13 : Photochemistry of alkenes and dienes	230-247
Unit 14 : Photochemistry of benzene derivatives	248-258
Unit 15 : Photochemistry of peroxides, nitrites, hypohalites, azo compounds and diazo compounds	259-270
BLOCK IV : STEREOCHEMISTRY-II	271
Unit 16 : Conformations of some acyclic molecules	272-290
Unit 17 : Conformations of cyclobutanes, cyclopentanes, cyclohexanes and monosubstituted cyclohexanes	291-303
Unit 18 : Conformations of disubstituted cyclohexanes, cyclohexenes and cyclohexanones	304-318
Unit 19 : Conformations of a few other monocyclic and bicyclic systems	319-330
Unit 20 : Conformation and reactivity	331-344

PAPER-VIII- PREPARATION OF DRUGS AND ESTIMATION OF DRUGS.

M.Sc. (Final) Practicals

BLOCK 1: PREPARATION OF DRUG INTERMEDIATE.	01
Experiment 1: Preparation of Paracetamol	02 -- 03
Experiment 2: Preparation of Phenytoin	04 -- 05
Experiment 3: Preparation of 6-Methyl Uracil	06 -- 08
Experiment 4: Preparation of Benzocaine	09 -- 13
Experiment 5: Preparation of Chloritone	14 -- 15
Experiment 6: Preparation of 4-Aminobenzene sulphonamide	16 --20
Experiment 7: Preparation of Florescence.	21 -- 23
Experiment 8: Preparation of Antipyrine	24 -- 27
Experiment 9: Preparation of Diazepam	28 -- 30
BLOCK 2: ESTIMATION OF ASSAY OF DRUGS IN GIVEN TABLETS AND INJECTIONS BY NON INSTRUMENTATION:	31
Experiment 10: Esterification of assay of Aspirin.	32 -- 38
Experiment 11: Esterification of assay of Ibuprofen.	39 -- 44
Experiment 12: Esterification of assay of Analgin.	45 -- 51
Experiment 13: Esterification of assay of Ascarbic acid.	52 -- 58
Experiment 14: Esterification of assay of Ca ⁺² ions in calcium gluconate injection.	59--64
Experiment 15: Esterification of assay of chloride in ringer lactate solution for injection.	65--7
BLOCK 3: ESTIMATION OF ASSAY OF DRUGS IN GIVEN TABLETS AND INJECTIONS BY INSTRUMENTATION:	72
Experiment 16: Estimation of assay of Sulphonilamides by potentiometric titrations	73 -- 76
Experiment 17: Estimation of assay of riboflavin by colorimetric titrations.	77 -- 80.
